

Crab sticks nú í Føroyum

Føroya Fiskasøla selir nú nógv umrøddu japansku fiskavørna, Crab Stick, í Føroyum. Crab Stick skal hvørki steikjast ella kókast. Tað skal tíðnast upp og kann estast beinanvegin — antin sum tað er, ella saman við salati ella øðrum.

Í vøruni er vanligt fiskafars, sum er útvaskað og viðgjørt á ávisan hátt. Síðani er krabbasmakkur settur til. Crab Stick er á stødd við ein vanligan fiskafingur og er pakkað í smáar eskjur. Tú kanst eta tað eins og tú etur góðgæti o.l.

Kostnaðurin fyri 8 crabstick rullur er umleið 12 kr. Veran er framleidd í Japan, men pakkað og seld av Føroya Fiskasølu. Ætlanin er at Blue North í Kollafirði skal fara undir framleiðslu av m.a. hesi vøruni um ikki so langa tíð. Endamálið við at fáa vørna úr Japan nú og pakka og selja hana undir navni Fiskasølunnar er at vita, hvussu undirtøkan er á europeisku mark-

aðunum fyri hesi nýggju vøruni.

Higartil hevur hon verið seld í Japan og USA og bert í smærri nøgdur í Europa. Tað er annars stóru áhugi millum fiskaframleiðarar í Europa at fara undir hesa framleiðsluna. Føroyingar tykiast so í løtuni at liggja fremst við hesum ætlanum.

Herfyri var ein blaðmaður frá heimskenda fiskivinnutíðarritinum, Fishing News International í Føroyum. Í mai hevði hann sína fyrstu grein frá ferðini og siggia vit hana endurprentaða her.

Aftaná at greinin hevði verið í blaðnum fekk ldnadartovan, sum hevur verið millumlið millum japanskar crabstick-framleiðarar og virkið Blue North í Kollafirði, fleiri áheitanir frá fólki aðrastaðni, sum vistu ætlanunum hjá Blue North at framleiða crab-stick og aðrar líknandi vørur stóran árs.

Ætlanin er at Fishing News International í næstum skal hava eina

New plant to make imitation shellfish from blue whiting

A NEW 11.6 million (£1 million) plant for making imitation crab and other shellfish products is being built in the Faroe Islands to catch in the large blue whiting

fishery.

Norway haul

The plant will be built by the Norwegian firm of Petrel Engineers Pte Ltd.

It will be built on the island of Vágar, near the capital, Torshavn.
