

Sjóvarfalsverkætlan í Vestmannasundi

Vestmannasund Tidal Energy Project

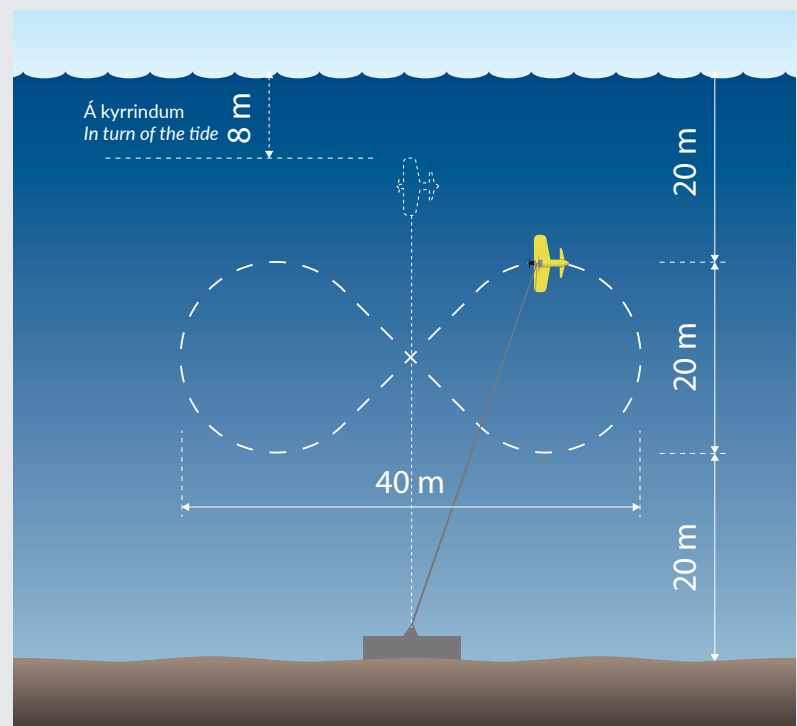

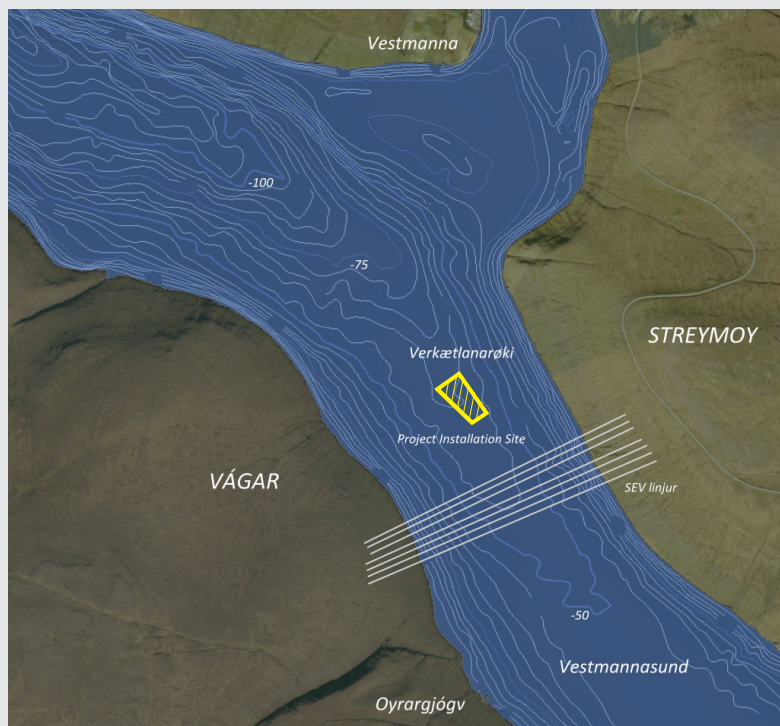

SEV samstarvar við svensku fyrirkuna Minesto um royndarverkætlan við sjóvarfalsorku, sum fevnir um tvær sjóvarfalsorkuturbinur (drekar) í Vestmannasundi.

Hvør dreki er 5m breiður og vigar 1,7 tons. Drekarir eru festir í botnin, og ferðast við 6-10 m/sek í eitt áttatal.

SEV is collaborating with Swedish marine energy technology company Minesto for a demonstration project involving two installations of Minesto's kite technology in Vestmannasund.

Each kite is 5m wide and weighs 1.7 tonnes. The kites are tethered to the seabed and move 6-10 metres per second.

ÁVARING

Ikki er loyvt at sigla ella fiska í verkætlanar-økinum. Vandi er fyri skaða á Minesto drekarar og/ella fiskireiðskapin.

WARNING

Do not sail or fish in the project installation site due to the risk of damaging the Minesto kites and/or your fishing equipment.

Kemur tú í samband við drekarar, ella varnast tú eitthvørt óvanligt við drekunum ella djóralívinum í økinum, vinarliga ring ella skriva til SEV.

Please contact SEV if you come into contact with the kites or spot anything unusual regarding the kites or the wildlife in the area.
