Lower fuel consumption on Jon Kjartansson SU-111

"Since we installed the Maren Energy Management System we have lowered the average on-board fuel consumption. These savings were achieved through Maren's optimization functionality and increased energy usage information. I now have a better view of the vessel's machinery which has helped me to identify areas for saving fuel. Maren has become one of my primary on-board management tools."

Gretar Rögnvarsson skipper on Jon Kjartansson SU-111

Maren 2

The Premier Energy Management System

Maren is the premium Energy Management System for ocean vessels. Maren is equipped with operational optimization, simulation-based decision support, extensive energy analysis tools and energy controlling features. Maren 2 is the ideal system for maximizing energy efficiency and minimizing fuel costs.
