

H79 \$1 EXTRA RUST WASH RUST SOLVENT HEAVY DUTY CLEANING AGENTS FROM THE EXPERTS

H79

Degreasing agent. Ideal for degreasing machine parts.

H79 dissolves oil, fat, tar and asphalt.

After immersing in H79 for 5-10 minutes, the oil and attached dirt can be brushed off and then rinsed off with water.

S-1 EXTRA

All round agent for heavy duty cleaning

S-1 EXTRA cleans all surfaces on a ship or oil rig, from the machine room to the bridge.

RUST WASH

As an alternative to the highly effective Rust Solvent we recommend the milder agent RUST WASH for less demanding rust cleaning tasks.

RUST SOLVENT

Ideal for outside maintenance on oil rigs, ships and other surfaces which are exposed to an aggressive and corrosive environment.

Removes rust stains and ensures an ideal surface for new paint. Rust discoloured metal surfaces, painted areas, glassfibre surfaces, and plastic can be treated with RUST SOLVENT making them appear newly painted.
